Informatica Cloud IDMC Developer

Description

Job Summary : We are looking for a skilled Informatica IDMC Data & Application Integration Specialist with a strong hands-on experience in CDI , CAI, API Manager, API Portal, and Integration Hub. The successful candidate will be responsible for the design, implementation, and maintenance of application integrations, APIs, and integration hubs using Informatica IDMC. This role demands technical expertise and the ability to collaborate with cross-functional teams to deliver seamless integration solutions that align with business needs.

Responsibilities

- Design, develop, and implement data integration solutions using Informatica IDMC – Cloud Data Integration (CDI)
- Develop end-to-end ETL/ELT pipelines for batch and near real-time data processing.
- Integrate data from multiple source systems into cloud data platforms, preferably Snowflake.

Application Integration:

- Build and manage integrations using Cloud Application Integration (CAI) for real-time and event-based data flows.
 - Collaborate with mobile/web application developers and ERP teams to understand integration requirements and translate them into technical solutions.
- Lead end-to-end integration projects, ensuring timely delivery and high-quality solutions.

API Management:

- Design, develop, and manage APIs using Informatica API Manager.
- Implement API security, versioning, and lifecycle management.
- Optimize API performance and troubleshoot issues as needed.
- Work with front-end and back-end developers to integrate APIs with various applications.

API Portal:

- Set up and maintain the Informatica API Portal for developers and partners.
- Provide technical support and guidance to API consumers.
- Manage and update API documentation, ensuring it is accessible and current.

Integration Hub:

- Design and implement integration solutions using Informatica Integration Hub.

Employment Type

Full-time

Industry

IT

Job Location

Dubai, UAE

Date posted

June 1, 2026

Valid through

01.06.2026

- Manage data synchronization and event-driven integration processes.
- Ensure data consistency and integrity across integrated systems.

Qualifications

5+ years of experience in IDMC CDI, application integration CAI, with a focus on Informatica IDMC. Strong expertise in Informatica API Manager, API Portal, and Integration Hub. Experience with RESTful and SOAP APIs, as well as API security protocols (OAuth, JWT, etc.). Proficiency in application integration and real-time data processing.

Education:

Bachelor's degree in computer science, Information Technology, or a related field
