React UI Developer

Description

mindX360 Technologies is an IT services company specialising in digital transformation and enterprise integrations. With a commitment to innovation, excellence, and customer satisfaction, we help businesses leverage technology to achieve their goals and stay competitive in today's dynamic marketplace.

mindX360 Technologies uses a combination of technology innovation and in-depth subject-matter, consulting, and advising knowledge to tackle complex business problems.

Our global cross-functional teams collaborate to develop end-to-end delivery, design, and strategic solutions.

We provide the best technology for rapid integration, digital evolution, application development, and strategic assistance to businesses in need of digital transformation services like Legacy Modernization, Business Automation, Cloud Transformation, etc.

We care about the ultimate business benefit and customer experience as much as our customers do, in each one of our relationships.

Job Summary

We are looking for a skilled React UI Developer with 4–6 years of experience in building modern, responsive, and scalable web applications. The ideal candidate should have strong expertise in React.js, JavaScript, HTML5, CSS3, and frontend architecture with a passion for creating high-quality user experiences.

Responsibilities

- Develop responsive and reusable UI components using React.js
- Collaborate with UI/UX designers, backend developers, and product teams
- Optimize applications for maximum speed and scalability
- Integrate REST APIs and third-party services
- Write clean, maintainable, and reusable code
- Ensure cross-browser compatibility and responsive design
- Participate in code reviews, debugging, and performance tuning
- Implement state management using Redux/Context API
- Follow Agile/Scrum development practices

Qualifications

- Strong experience in React.js
- Proficiency in JavaScript (ES6+), HTML5, CSS3
- Experience with Redux, Context API, Hooks
- Good understanding of responsive web design
- Experience with REST API integration
- Knowledge of TypeScript is a plus
- Familiarity with Git/version control systems
- Experience with build tools like Webpack/Vite
- Understanding of frontend performance optimization
